#### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Patrick Hilsmier on 22 April 2008.

The application has been amended as follows: On line 19, of claim 38, delete "1".

### Allowable Subject Matter

- 2. Claims, 11, 12, 22 and 36-38 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claim 11 is because the prior art of record does not teach a refrigerator that includes a derivation component being configured to derive the high refrigerant pressure or low refrigerant pressure of the refrigerant circuit based on the motor driving torque identified by the refrigerant identification component and the refrigerant state detected by the refrigerant detecting component along with the other limitations of claim 11.

The primary reason for the allowance of claim 12 is because the prior art of record does not teach a refrigerator that includes a derivation means that is formed such that the relationship between the motor driving torque corresponding to at least one of a refrigerant temperature and a refrigerant pressure of the refrigerant circuit and the degree of suction superheat of the compressor is set beforehand and such that the

degree of suction superheat of the compressor is derived based on the motor driving torque identified by the identification means and the refrigerant state detected by the refrigerant detecting component along with the other limitations of claim 11.

The primary reason for the allowance of claim 22 is because the prior art of record does not teach a refrigerator that includes a prediction component that is formed such that a stationary torque for the motor in its steady state is set based on the motor driving torque identified by the identification component and based on the refrigerant state detected by the refrigerant detecting component and such that the poor lubrication or liquid compression of the compressor is predicted by making a comparison between the stationary torque and the motor driving torque identified by the identification component along with the other limitations of claim 22.

The primary reason for the allowance of claims 36 and 37 is because the prior art of record does not teach a refrigerator that includes an identification component that obtains a motor voltage equation in such a way that a d-axis is plotted in the direction of the N pole of magnets of the motor, a q-axis is plotted in the direction which is shifted forward from the d-axis by pi/2, and a motor basic voltage equation for a three-phase permanent magnet synchronous motor is converted into a d, q axis coordinate system which rotates at an electric angular speed, and the identification component then identifies a magnetic flux characteristic voltage associated with the armature flux linkage generated by the magnets, using the motor voltage equation, and a derivation component that derives the temperature of the magnets as motor temperature based on

the magnetic flux characteristic value identified by the identification component along with the other limitations of claim 36.

The primary reason for the allowance of claim 36 is because the prior art of record does not teach a refrigerator that includes a calibration component being configured such that the motor temperature derived by a derivation component being regarded as the internal temperature of the compressor, the internal temperature derived by the derivation component is calibrated based on the discharge pipe temperature detected by the temperature detecting component along with the other limitations of claim 38.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
